I.C.E Aluminium Pte. Ltd.

ABOUT US

I.C.E ALUMINIUM Pte. Ltd.

With more than 25 years in the aluminium manufacturing industry, Lianjo Aluminium was founded in 1994 and took over Libang metal manufactory in Tangxia, Dongguan, Guangdong. Guangdong, a major manufacturing hub in China, is one of the largest manufacturing industrial sectors for electronics and communications devices around the world. In 2018, we ventured into the worldwide market and I.C.E Aluminium Pte. Ltd. was formed. I.C.E Aluminium Pte. Ltd. is based in Singapore and is a wholly-owned subsidiary of Lianjo Aluminium Limited.

I.C.E

I.C.E reflects our philosophy of “Inventiveness, Conscientiousness & Exactitude” and our aspiration to explore endless business opportunities in the aluminium industry and beyond. We strive to have a conscientiousness attitude towards every client and carry out great exactitude of the accurate details of every product.

OUR SERVICES

- I.C.E Aluminium emphasizes on product quality, where we follow a strict and effective time schedule for reviewing the prototypes before production.
- Equipped with advanced types of machinery and special tooling, alongside with a dedicated team of highly experienced and skilled professionals, we strive to meet the demands of our valued clients.
- Component Manufacturing
For the convenience of our clients, we provide one-stop turnkey component manufacturing solutions, ranging from fabrication and machining to surface finishing. From the prototyping process to mass production, you can be assured of unsurpassed product quality and prompt delivery commitment.

We provide machining services to a broad range of aluminium, up to a length of 2.5 metres, and assembly services with metal and non-metal parts.

2.5 metres

Our partner provides 1800 tons and 3600 tons of extruders, which can produce profiles with a cross-section width of 350mm.

PRECISION FABRICATION

Major Machinery & Equipment

- 2 units - Aluminium extrusion machine (600t & 1200t)
- 12 units - 3 Axis CNC Machining Centre with Indexer
- 7 units - 4 Axis CNC Machining Centre with Indexer
- 6 units - Conventional Milling Machine
- 3 units – Conventional Lathe Machine
- 9 units - Tapping Machine
- 2 units - Vertical Bandsaw

Custom makes profile according to customer design
We extrude customize aluminium profile as per your design.

OUR PRODUCTS

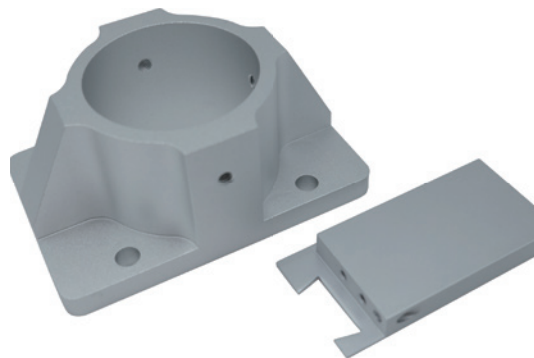

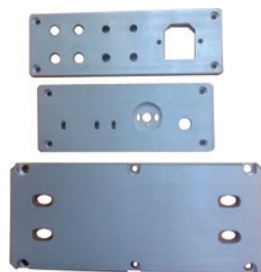

01

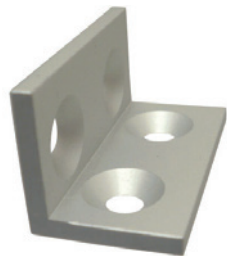

I . C . E A l u m i n i u m

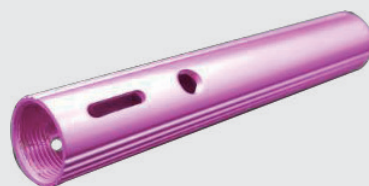

We manufacture high quality precision aluminium extrusions that are made into components found in sophisticated products of the high-tech electronics and precision engineering industries. We are also able to extrude customized aluminium profiles as per clients' designs and requirements.

We are committed to quality excellence while delivering high standards of quality products to our clients. Our close communication with them and our short lead time to deliver our products offer them the flexibility to review and modify product prototypes before mass production begins – a service that is highly valued by our clients.
